

## DENR Environmental Laboratory Recognition (ELR) Scheme

### Level 4: Review by the TAG-LR Members

This level is where the Technical Advisory Group for Laboratory Recognition (TAG-LR) reviews and consolidates all the laboratory inspection reports, including the corrective actions submitted by the laboratory on all the assessment findings issued, and the results of the proficiency testing (section 4d of DAO 63). The members of the TAG-LR are:

- The Chairperson of the LIAT;
- Representative of professional chemical associations;
- Technical representative of environmental NGOs;
- Director, EMB; and
- Undersecretary for Environment, DENR.

The TAG-LR shall then recommend to the DENR Secretary the issuance or non-issuance of the Certificate of Recognition to the applicant laboratory.
